Ministry of New and Renewable Energy  
Government of India

## New Energy Cooperation Agreement

Cooperative company: Heating Solar Pte Ltd

**Purpose:** In terms of gross domestic product and electricity consumption, India is now one of the fastest growing countries in the world. The challenge is how to meet the high economic growth and low energy consumption energy needs of about 1.3 billion people. The development of an efficient, coordinated, economical and powerful power system is essential for the smooth flow of electricity from the power station to the load center (according to the 2003 Electricity Law) and the best use of the country's resources to provide reliable energy. , Low price Everyone can enjoy low-cost, uninterrupted (24x7) and high-quality power supply.

### Collaboration plan

Become a leader in the development and design of solar power plants and solar parks to promote the use and commercialization of solar energy.

With the strong support of the government, we will build more solar power stations in more regions. We develop, plan, construct and design practical scale operations for commercial and industrial photovoltaic power plants. Solved the current power shortage of more than 163 million people.
